DUBLIN CASTLE,
25th February, 1916.

SIR,

I have to acknowledge the receipt of your letter of the 24th instant forwarding, for submission to His Excellency the Lord Lieutenant, the Report on the Trade in Imports and Exports at Irish Ports for the year ended 31st December, 1914.

I am,

Sir,

Your obedient Servant,

E. O'FARRELL.

THE SECRETARY,

DEPARTMENT OF AGRICULTURE

AND TECHNICAL INSTRUCTION FOR IRELAND,

DUBLIN.

REPORT ON THE TRADE

IN

IMPORTS AND EXPORTS AT IRISH PORTS

DURING THE YEAR 1914.

TO THE SECRETARY OF THE DEPARTMENT OF AGRICULTURE AND
TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the Report on the Trade in Imports and Exports at Irish Ports during the year ended 31st December, 1914.

The publication of this Report has been unavoidably delayed by the fact that most of the clerical staff engaged in its compilation have joined His Majesty's Forces since the outbreak of war.

The inadequacy of the present system of returns upon which these Reports are based and the importance of this consideration has been fully dealt with in previous Reports.

In the tables and figures herewith submitted, as explained in previous Reports, Irish imports and exports mean all goods imported or exported by Ireland, whether from or to Great Britain, the Colonies, or foreign countries—the terms including not only the colonial and foreign trade, but also the Cross-Channel trade between Great Britain and Ireland. The import and export trade is thus the sum of three things: (1) the direct trade between Ireland and all other countries outside of Great Britain; (2) the indirect trade of Ireland with these same countries *via* Great Britain; and (3) the local trade between Ireland and Great Britain.

As a result of inquiries which have been carried on each year since the figures for 1904 were published, an estimate more nearly approaching accuracy can now be made regarding the values of certain classes of produce imported and exported during those years. In all such cases the figures have been revised.

The total import and export trade at Irish ports in 1914 is estimated at £150,970,220 as compared with £147,550,538 in 1913, an increase of £3,419,682. The imports amounted to a total of £73,659,168, and were £13,981 less than in 1913; the exports amounted to £77,311,052, which was £3,433,663 more than the value for 1913. The following statement shows the

total estimated values of imports and exports in the eleven years 1904-1914:—

	Imports.	Exports.	Total.
	£	£	£
1904	54,402,187	40,784,760	104,246,047
1905	56,153,498	51,392,547	107,546,045
1906	57,918,851	56,005,303	113,924,154
1907	62,125,028	59,159,532	121,285,460
1908	59,297,407	57,414,977	116,712,384
1909	64,231,353	60,029,183	125,160,536
1910	65,478,482	65,895,960	131,374,442
1911	66,748,536	65,071,018	131,819,554
1912	73,167,699	67,167,904	140,335,603
1913	73,673,149	73,877,389	147,550,538
1914	73,650,168	77,311,092	150,970,220
1914 over 1904	19,166,981	27,526,292	46,723,273
" " 1905	17,505,670	25,918,505	43,424,175
" " 1906	15,740,317	21,305,749	37,046,066
" " 1907	11,533,240	18,151,520	29,684,760
" " 1908	14,361,761	10,896,075	25,257,836
" " 1909	9,427,815	16,381,869	25,809,684
" " 1910	8,180,686	11,415,092	19,595,778
" " 1911	6,910,632	12,240,034	19,150,666
" " 1912	491,460	10,143,148	10,634,617
" " 1913	— 13,587	3,433,063	3,410,682

It will be seen that the values of imports have shown an increase each year compared with the previous year since 1904, with the exception of the years 1908 and 1914, and likewise the exports have shown an increase each year, with the exception of the years 1908 and 1911.

From these figures it will be seen that the trade in 1914 shows

Changes in
Prices.

an improvement on 1913, and exceeds the records of any of the preceding years. In considering, however, the increases or decreases in trade it should be borne in mind that the rise or fall in the total value is to a considerable extent due to the rise or fall in the prices of commodities. In recent years—in fact since 1896—there has been a marked upward tendency in prices, and considering in particular the period from 1904 to 1914 prices fell in 1905, rose in 1906 and 1907, fell in 1908, and increased again from 1909 to 1914. (It should be borne in mind that the average prices for 1914 were not considerably in excess of those for 1913; the high war prices from August to the end of the year were only just able to counterbalance the sharp fall in prices from the beginning of the year to the outbreak of war.) The total value of the import and export trade of Ireland has increased in a most satisfactory manner since 1904, but the increase in the *volume* of the trade has not been so great. This latter increase may be measured by assuming that prices have remained the same in each succeeding year as in 1904. If prices had remained the same as in 1904, the total values of the imports and exports respectively would have been as shown in

columns (2) and (4) instead of the figures shown in columns (1) and (3) of the following table :—

YEAR.	Imports.		Exports.	
	Values as estimated at the prices of each year.	Values as estimated at prices of 1904.	Values as estimated at the prices of each year.	Values as estimated at prices of 1904.
	1,000 £'s. (1)	1,000 £'s. (2)	1,000 £'s. (3)	1,000 £'s. (4)
1904,	54,462	54,462	49,785	49,785
1905,	56,153	56,210	51,393	50,833
1906,	57,910	56,648	56,005	53,415
1907,	62,126	58,178	59,160	54,492
1908,	59,297	55,937	57,418	53,702
1909,	64,231	58,563	60,929	54,762
1910,	65,478	58,071	65,896	56,908
1911,	66,749	59,337	65,071	56,330
1912,	73,168	62,270	67,166	56,710
1913,	73,673	62,041	73,877	60,567
1914,	73,659	60,649	77,311	63,243

The above table shows that while the total value of imports in 1914 had only very slightly decreased, the volume had appreciably decreased, and that the total value and total volume of exports had considerably increased. The increase in exports was almost entirely due to the increase in the output of shipping tonnage.

The figures in the tables of imports and exports include not only articles imported for home consumption but also consignments which have been re-exported without going through any process of manufacture. But this trade is a small proportion of the total Irish trade. In the case of certain articles such as tea, coffee, sago, it is evident that the quantities exported represent re-exports, which are either being returned or re-distributed. In respect of other articles, such as leather, apparel, machinery, etc., it is a matter of considerable difficulty to ascertain, even approximately, the proportion of (a) goods which are re-exports, (b) goods which having been imported and having undergone some process of manufacture are then exported, and (c) goods which are largely or wholly the product of Irish industry. Making as careful an estimate as existing information permits it would appear that in 1914 goods to the value of approximately £2,500,000 may be taken to have been returned or re-exported without undergoing any process of manufacture. Deducting this sum from the totals of imports and exports respectively it leaves in 1914 for the purposes of Irish consumption and manufacture a net total import of approximately, £71,159,168, and a net Irish export of approximately, £74,811,052, the total Irish trade, excluding re-exports, amounting in 1914 to £145,970,220. The corresponding figure for 1913 was £141,550,538. The re-imports are small.

The following summary tables show the total values of the different groups of goods imported and exported during each of the five years 1910 to 1914 :—

IMPORTS.

In order to indicate briefly the main divisions of the trade the preceding summary has been adopted, showing respectively the various classes of (I) farm produce, food and drink stuffs, (II) raw materials, and (III) manufactured goods. Any such classification has drawbacks. There are certain goods which might be placed in one class or another, but the present division is simple, well known, and of practical interest, and with the particulars set forth in the accompanying tables it is easy to re-arrange the groups for other purposes of comparison as may be required.

It will be seen from the summary tables that in the case of imports there was a decrease in 1914 in raw materials and manufactured goods, while there was an increase in farm produce, food and drink stuffs. In the case of exports there was an increase in each of the three divisions, but it is in the output of shipping tonnage for English and Scotch orders that the increase principally occurs.

These summary tables show that the percentages of the three classes which make up the total values of imports and exports were in each of the years 1910 to 1914 as follows:—

<i>Imports.</i>	1910	1911	1912	1913	1914
(I.) Farm Produce, Food and Drink Stuffs ..	36	36	36	35	37
(II.) Raw Materials ..	15	14	15	15	14
(III.) Manufactured Goods ..	49	50	49	50	49
Total ..	100	100	100	100	100
<i>Exports.</i>					
(I.) Farm Produce, Food and Drink Stuffs ..	54	52	52	55	54
(II.) Raw Materials ..	6	6	7	6	6
(III.) Manufactured Goods ..	40	42	41	39	40
Total ..	100	100	100	100	100

Following the classification in the above summary attention is directed to the main groups and the articles of chief importance in them.

I.—FARM PRODUCE, FOOD AND DRINK STUFFS.

The group of farm produce, food and drink stuffs represents an import and export amounting in 1914 to £68,870,457 out of a total of all imports and exports estimated at £150,970,220. It is important to note that a very large proportion of even the imports into Ireland consists of agricultural produce:—bacon, eggs, poultry, butter, grain, flour, food stuffs, fruit, and vegetables. And if to these articles are added flax, hides, wool, skins, etc., which are included under raw materials, the total import of farm produce alone reaches £22,500,000. This feature of Ireland's trade deserves close attention, as it is significant that this country with its agricultural capacity and potentiality should be annually importing so great a quantity of farm produce, much of which it is admirably suited to raise at home.

In the case of exports from Ireland, live stock, bacon and hams, butter, poultry, eggs, oats, potatoes, vegetables, and flax, etc., together with the products of the live stock industries, such as hides, skins, wool, feathers, etc., amount to a value of £37,800,000, or nearly half the total exports of Ireland. Large as this export

is, the fact is seldom realised that Ireland, while exporting annually farm produce and food stuffs to the value of £37,800,000 is importing food stuffs and farm commodities of a value of £22,500,000.

The chief agricultural export of Ireland is live stock, which amounted in 1914 to a total estimated value of

Live Stock.

£17,572,215, a decrease of nearly £2,000,000 as compared with the export of 1913, but showing an increase of over £5,000,000 as compared with the export in 1912. The high figure for 1913 was mainly due to the very large numbers of store cattle which were held back from shipment during the second half of the year 1912 in consequence of the restrictions imposed on the exportation of live animals through the outbreak of foot and mouth disease, and which were exported in the early months of 1913. High prices on account of the big demand for beef in Great Britain, brought about by war conditions, induced the Irish farmers to dispose of large numbers of fat cattle for cross-channel export during the last four months of 1914. The numbers exported from Ireland during that period amounted to 278,786 compared with 144,569—the average for the corresponding months of the previous five years. The total value of the exports of cattle in 1914 is estimated at £14,345,161 as compared with £15,464,468 in 1913, £8,286,868 in 1912, and £9,566,393 in 1911. The total number of cattle shipped in 1914 amounted to 945,410, which, with the exception of the year 1913, is the highest figure on record since 1878, when the published returns of the exports of animals from Ireland were first issued. The shipments of sheep and lambs fell to 539,107 in 1914, which is less than the number exported in any year since 1884. The number of pigs exported only amounted to 147,924, which is the lowest figure on record. The number of horses exported decreased from 36,643 in 1913 to 30,940 in 1914, the decrease in value being estimated at £272,215. Horses purchased in Ireland by the Army Authorities and subsequently exported are not included in these figures.

The following statement gives the numbers and estimated values of live stock exported in the years 1911, 1912, 1913, and 1914:—

	Number				Value			
	1911	1912	1913	1914	1911	1912	1913	1914
Horses, ..	31,710	34,840	36,043	30,040	1,475,690	1,427,040	1,705,280	1,431,645
Cattle—Fat, ..	240,946	336,583	354,953	455,817	4,460,063	5,766,789	6,307,811	8,181,015
Stores, ..	390,294	104,113	693,374	448,683	4,947,563	2,306,054	3,650,187	5,960,196

Total Pigs, ..	342,340	265,841	200,296	147,924	1,631,828	1,400,053	1,024,197	736,688

Live stock imports into Ireland are very small, the total estimated value in 1914 amounting to £300,979 as compared with £289,993 in 1913. This figure, it should be remembered, includes a considerable number of horses which are temporarily imported chiefly for sporting purposes which also swell the export returns. The largest import is of sheep and lambs, of which 16,815 were imported in 1914 as compared with 15,120 in 1913. A few breeding cattle are also imported.

The exports and imports of beef, mutton, bacon and hams, etc., form also a very important and interesting class. In 1914 the total value of these exports from Ireland was estimated at £5,287,080 while the corresponding imports amounted to £3,749,127.

The following table shows for the years 1911 to 1914 the total quantity and the estimated total value of each main class imported and exported:—

IMPORTS.

	Quantities.				Values.			
	1911	1912	1913	1914	1911	1912	1913	1914

(a) Poultry is not included here.

(b) It is found that under this heading quantities of bacon and hams are exported.

From this table it will be seen that in 1914 the total value of meats imported into Ireland, though less than in 1913, was greater than in any year since 1904, and that it was made up almost wholly of bacon from Canada and Denmark, pigs' heads from Denmark, beef from the Argentine, and mutton from New Zealand and Australia—all products which are capable of being raised at home.

The total value of dead meat exported from Ireland was the highest recorded since 1904. The increase compared with 1913 took place chiefly in the value of beef and mutton shipped from Ireland which amounted to £480,903 in 1914 compared with £114,524 in 1913, and £266,300 in 1912. The value of bacon and hams exported was slightly less than in 1913 and 1912; in 1914 it amounted to £4,064,881. If to this export is added the export of pork and coarse pig meat, the value of the products of the pig exported will amount to over £4,600,000. It is interesting thus to note that, including the export of live pigs, the total export value of pigs and pig products in 1914 amounted to a sum of over £5,300,000 sterling.

The returns indicate an increase in the export of poultry as compared with 1913. The estimated value exported in 1914 amounted to £1,071,880 as compared with £986,241 in 1913. It is estimated that one-third of these values represented live poultry. There was an increase in the quantity of eggs exported in 1914 as compared with 1913, the total quantity exported being the greatest recorded in this series of returns.

The following statement shows the quantities and estimated values of imports and exports of eggs during the years 1904–1914:—

Year.			Imports.		Exports.	
			Gt. Hds.	Value. £	Gt. Hds.	Value. £
1904	114,192	37,112	5,738,129	2,044,208
1905	116,380	41,218	6,194,132	2,387,322
1906	99,755	37,408	6,494,532	2,604,578
1907	103,107	41,036	6,675,599	2,781,500
1908	101,999	41,487	6,501,195	2,729,147
1909	81,891	34,805	6,362,714	2,803,221
1910	92,101	39,191	6,327,820	2,744,193
1911	97,638	43,512	6,488,776	2,940,227
1912	99,298	45,326	6,313,325	2,926,582
1913	89,568	42,140	6,398,235	3,019,167
1914	65,545	34,135	6,824,612	3,383,870

The exports of eggs and poultry together in 1914 amounted to £4,455,759, and if to this is added the export of feathers, amounting in 1914 to £31,567, a total export of £4,487,326 is recorded. These figures do not include consignments sent by parcel post.*

* So far as agricultural produce is concerned the parcel post trade is mainly confined to the carriage of butter, eggs, and poultry. Through the courtesy of the Postmaster-General, the Department have been informed that approximately 3,360,000 parcels are posted annually from Ireland to Great Britain: that it is estimated that about 1,120,000 parcels are of butter, eggs, and poultry and that the average weight of all inland parcels is 2 lb. 10 ozs. Assuming the export of butter, eggs, and poultry by parcel post to have an average weight per parcel of 3 lbs. the export by parcel post of butter, eggs, and poultry would amount to 30,000 cwts.

The imports of poultry and eggs into Ireland are small, amounting in value in 1914 to £54,117 as compared with £59,003 in 1913. Thus, in estimating the value of the poultry and egg industry to the country, it should be borne in mind that practically the entire home demand is supplied by the home article, and that the export represents the surplus production of poultry and eggs. These facts bring home the great importance of the poultry and egg industries to Ireland. Attention is specially directed to diagram I. (see page xxiv.) which shows for the year 1914 (1) the total monthly import of eggs into the United Kingdom from foreign and colonial countries; (2) the quantity of eggs exported from Ireland each month; and (3) the monthly average export price of Irish eggs.

The quantity and value of butter exported in 1914 were greater than in any previous year for which records are available. The following table shows the quantity and value imported and exported in each

year since 1904:—

Year.	Imports.		Exports.	
	Quantity.	Value.	Quantity.	Value.
	Cwts.	£	Cwts.	£
1904	59,053	300,924	819,252	3,666,792
1905	57,438	314,234	813,921	4,048,409
1906	60,194	300,128	844,027	4,283,437
1907	63,258	360,571	818,004	4,009,672
1908	62,918	384,287	751,942	4,026,623
1909	68,347	394,867	719,625	3,625,111
1910	77,945	477,798	698,907	3,584,810
1911	88,472	535,207	689,362	3,671,264
1912	65,731	432,555	778,778	4,159,972
1913	71,585	454,831	725,368	3,735,645
1914	73,935	467,462	855,068	4,641,673

As in the case of eggs, these figures do not include consignments sent by parcel post. There is also difficulty in obtaining a record of small consignments of butter under 28 lbs. as these are frequently entered in the returns as "parcels" or "sundries." Attention is directed to diagram II. (see page xxiv.) which shows for the year 1914 (1) the imports of butter into the United Kingdom from the Colonies and foreign countries; (2) the quantity of butter exported each month from Ireland; and (3) the average monthly export price of Irish creamery butter.

There was an increase in the export of fish from Ireland in 1914, the total value including shell-fish, exported being estimated at £451,880 in 1914, as compared with £388,028 in 1913; the value of fish, including shell-fish, imported in 1914 was estimated at £392,852, as compared with £325,674 in 1913.

Much the largest import among the grain foods for human consumption is wheat and wheat flour. The quantities and estimated values imported into Ireland respectively in each of the years 1904 to 1914 were as follows:—

Year.	Wheat Imports.		Wheat Flour Imports.	
	Quantity.	Value.	Quantity.	Value.
	Cwts.	£	Cwts.	£
1904	6,932,956	2,599,857	5,529,278	2,764,639
1905	7,502,728	2,907,307	5,596,214	2,798,107
1906	6,927,827	2,439,172	5,399,355	2,521,187
1907	7,147,511	2,829,223	5,261,807	2,652,726
1908	6,764,866	2,931,442	4,897,158	2,563,805
1909	8,233,011	3,979,289	4,513,657	2,595,353
1910	7,997,988	3,532,445	4,602,990	2,685,078
1911	7,839,093	3,233,626	5,001,058	2,625,555
1912	7,471,974	3,300,122	4,775,022	2,586,795
1913	7,849,871	3,368,903	4,968,282	2,629,049
1914	7,295,225	3,313,248	5,198,035	2,838,919

From these figures it appears that the quantity of wheat imported in 1914 was less than in any year since 1908, though the imports of wheat flour showed an increase in 1914, and the value was the highest recorded. In the agricultural statistics of Ireland the amount of Irish-grown wheat in 1914 was estimated at 758,154 cwts., and if it is assumed that one and a-half tons of wheat produce one ton of flour, the total quantity of flour represented by imports of wheat and flour and by home-grown wheat amounted to 10,566,954 cwts. From this quantity has to be deducted an export of flour, or its equivalent in wheat, amounting to 193,299 cwts., leaving thus a residue of 10,373,655 cwts. for consumption in Ireland.

The imports of barley decreased from 1,521,715 cwts. in 1913 to 804,736 cwts. in 1914, but this decrease was counterbalanced by increased imports of malt, which amounted to 1,216,943 cwts in 1914, as compared with 746,069 cwts. in 1913. The export of oats increased from 1,475,509 cwts. in 1913 to 1,540,569 cwts. in 1914.

Among cattle feeding stuffs the chief import is maize, a very great quantity of which is annually imported into Ireland. A considerable quantity, however, is each year re-exported—in 1914 to the value of £261,627. The following are the total quantities and values of maize imported in each of the years 1904 to 1914:—

Year.	Quantity.	Value.
	Cwts.	£
1904	13,251,493	3,147,229
1905	11,268,018	2,957,854
1906	13,494,190	3,295,197
1907	15,147,020	4,133,876
1908	10,934,929	3,368,520
1909	12,627,450	3,862,630
1910	11,435,688	3,168,639
1911	11,927,375	3,304,877
1912	13,582,134	4,244,417
1913	14,886,194	4,154,054
1914	13,128,145	4,102,545

Together with the above import of maize, the imports of bran, pollard, and the various classes of cattle meals and cakes, brought the total value of feeding stuffs imported in 1914 to a sum estimated at £5,446,915 as compared with £5,422,110 in 1913.

There was an increase in the quantity of tea and a decrease in the quantity of sugar imported in 1914 compared with 1913. The quantity of tea imported was returned as 39,611,040 lbs. in 1914 compared with 32,663,344 lbs. in 1913. The quantity of sugar imported was 3,677,266 cwts. in 1914 compared with 2,836,928 cwts. in 1913. The quantities of tea and sugar mentioned in this Report are gross weights.

There was an increase in the quantities of both unmanufactured and manufactured tobacco imported into Ireland in 1914 as compared with 1913. The exports of manufactured tobacco also showed an increase. As a result of further inquiries it has been found that "stalks, shorts, and waste unmanufactured tobacco" exported from Ireland was included in the figures for unmanufactured tobacco returned to this Department; and accordingly the figures already published for unmanufactured tobacco have been revised, and a new heading for "Tobacco stalks and waste" has been added to the tables of this Report. The figures published for unmanufactured tobacco imported and exported have been kindly furnished by the Customs and Excise Department, who guarantee their accuracy; the figures for manufactured tobacco are those returned by postal authorities, railway and shipping companies, etc., who furnish the returns to this Department.

The following table shows the total quantities of the imports and exports of tobacco during each of the years 1910 to 1914:—

Year.	Imports.		Exports.		
	Unmanufactured.	Manufactured.	Unmanufactured.	Manufactured.	Stalks and Waste.
	Lbs.	Lbs.	Lbs.	Lbs.	Lbs.
1910 ..	14,183,918	3,189,312	723,652	7,550,598	1,182,851
1911 ..	13,931,026	3,155,712	902,069	7,744,710	1,405,101
1912 ..	15,884,015	4,031,496	705,414	8,208,810	1,215,827
1913 ..	9,234,762	4,687,116	772,488	8,098,378	972,335
1914 ..	12,980,192	5,346,348	811,633	8,295,537	1,436,493

The values of alcoholic beverages and all other dutiable articles which appear in this Report are estimated exclusive of duty. The value of home-made spirits imported amounted to £45,405 in 1914 as compared with £52,245 in 1913; the value of the exports was £1,930,377 as compared with £2,008,500 in 1913. The imports of foreign spirits amounted to £115,455 as compared with £108,608 in 1913. The value of ale, beer, and porter imported was £618,459 as against £569,960 in 1913; the exports amounted to £2,452,205 in 1914 as against £2,273,679 in 1913.

In order to furnish the means for comparing the exports of
 Imports of agricultural produce from Ireland with the
 Agricultural imports of similar products from colonial and
 Produce from foreign countries into the United Kingdom, a
 Colonial and table is presented as Appendix II. showing for
 Foreign Countries. the year 1914 the quantities and values of the
 chief articles of agricultural produce imported
 into the United Kingdom* from British possessions and foreign
 countries and the corresponding exports from Ireland to Great
 Britain.

This table will bring home to Irish producers and exporters the extent of the existing market in Great Britain, and the strength in that market of the several competitors, while at the same time it shows the very important position which Ireland at present holds in the British market.

Thus in 1914 :—

(1) The value of cattle and beef exported from Ireland to Great Britain in 1914 and previous years, with the exception of 1912, was greater than the value imported from any other country. In 1914 the Irish export amounted to a value of £14,807,000; the next largest import was from Argentina, valued at £14,114,000. The import from Australia, valued at £4,352,000, came next in order of magnitude.

(2) The Irish export of sheep and mutton, valued in 1914 at £1,073,000, was the fourth greatest, being exceeded by the imports from New Zealand £5,460,000, Australia £2,911,000, and Argentina £2,394,000.

(3) As regards the total value of bacon, hams, pork, and live pigs, Ireland comes third on the list with a value amounting to £5,019,000 as compared with £10,129,000 from Denmark and £8,290,000 from the United States of America. The imports from the Netherlands came fourth with a value of £3,108,000.

(4) The export of poultry from Ireland was much greater than that from any other country into the United Kingdom, Ireland exporting to Great Britain poultry to the value of £1,071,889, while the largest values of imports from other countries to the United Kingdom were—from Russia, £356,824, and United States, £149,355.

(5) The Irish export of butter, value £4,641,673, to Great Britain was the second largest in quantity and value; the export from Denmark into the United Kingdom being first, value £11,038,637, and that from Russia third, value £3,382,411.

(6) The Irish export of eggs was second largest in quantity but largest in value, amounting to 6,824,612 *gt. hnds.*, valued at £3,383,870, the imports into the United Kingdom from Russia being the largest in quantity amounting to 6,870,827 *gt. hnds.*, valued at £2,914,085.

*At present (excepting certain specified articles) the quantities and values of foreign and colonial goods imported are known for the United Kingdom only. Nothing beyond an estimate can be formed as to how far these goods are imports for consumption in Great Britain and how far for consumption in Ireland.

(7) The Irish export of potatoes, which amounted to 187,922 tons, valued at £634,237, was the largest quantity imported into Great Britain, but the value was exceeded by the imports from the Channel Islands, amounting to £715,748. The quantity imported from the Channel Islands amounted to 60,097 tons, but as their trade is chiefly in early potatoes, the value was greater than that of the export from any other country. The next largest quantity, amounting to 58,805 tons, was imported from France.

(8) As regards oats, the export from Ireland was fifth, Argentina Germany, United States, and Canada being the largest exporters to the United Kingdom.

The above cases are sufficient proof of the very strong position which Ireland holds in the markets of Great Britain, and as these are the great open markets of the world for agricultural produce, the figures bring out plainly the wide and representative character of Irish agricultural exports.* This consideration should, therefore, be kept in mind when comparisons are made between the export of particular commodities from Ireland and the corresponding export from any other country.

II. RAW MATERIALS.

For the purposes of the broad classification adopted in the summary tables, pp. viii. and ix., raw materials include coal, coke, rough and sawn timber, boards and deals, stones, slates, sand, clay, metal ores and other mineral substances, hides, skins, horns and hoofs, wool, bristles, feathers, flax, raw cotton, hemp, jute, tow, waste, seeds, plants and bulbs, ice, &c. The total value of raw materials imported, into Ireland in 1914 was estimated approximately at £10,267,864, as compared with £11,168,847 in 1913. The imports consist mainly of coal, wood, flax and other raw materials of the textile industries. There is also a large import of raw cotton, which is re-exported to Northern Europe.

The exports of raw materials in 1914 were estimated at a value of £4,526,980 as compared with £4,511,104 in 1913. Excluding the re-export of raw cotton, valued in 1914 at £812,927, these consist mainly of animal produce, such as hides, skins, wool, fats, &c., and, to a lesser extent, of seeds, timber, and other vegetable produce. The item raw cotton, which has been referred to above, while it must be accounted for in a record of Irish trade, is neither an import for home consumption nor an export of domestic produce, neither is it worked up in any way in Ireland, but is merely transhipped.

*Irish export values are f.o.b., and thus do not include cost of transit from Irish Ports to British market centres; whereas foreign and Colonial imports are c.i.f., and thus include transit costs. This difference makes the total foreign values, e.g., of eggs, butter, etc., appear somewhat higher relatively to the Irish than they actually are.

The estimated values of the chief imports of raw materials in each of the years 1910 to 1914 were as follows:—

IMPORTS.

—	1910.	1911.	1912.	1913.	1914.
	£	£	£	£	£
Coal,	2,778,044	2,770,064	2,090,068	3,269,344	3,017,812
Slates,	139,904	120,574	120,322	101,436	95,357
Timber,	1,841,204	1,735,063	1,837,159	1,896,025	1,898,824
Flax,	1,867,372	1,955,355	2,416,958	2,300,115	2,031,003
Hemp and Jute, Tow and Cordage, ..	554,369	550,731	657,456	710,268	699,191
Lard, Tallow, &c. ..	376,061	269,990	197,585	216,744	246,056

The values of the chief exports in the same years were:—

EXPORTS.

—	1910.	1911.	1912.	1913.	1914.
	£	£	£	£	£
Timber	240,851	251,452	259,131	235,920	282,222
Hides and Skins, ..	608,332	593,993	697,008	735,416	829,210
Wool,	631,197	575,173	773,220	511,566	800,985
Lard, Tallow, &c., ..	507,980	412,028	415,008	379,402	425,809
Grass Seed,	371,570	371,388	333,094	251,151	235,646

In connection with the above figures it should be stated that the imports of wood and timber, estimated in 1914 at a value of £1,898,824, consist mainly of sawn timber, boards and deals, whereas 90 per cent. of the exported timber is shipped out of the country in the round or rough state—an uneconomic condition of affairs. The large export likewise, of hides and skins, amounting in 1914 to £829,219, should be compared with the imports of leather and leather goods, boots, shoes, saddlery, &c., which approximate a value of £2,500,000 of goods imported. There was a very large export of wool, which amounted in 1914 to 16,367,232 lbs., valued at £800,985, compared with 10,231,312 lbs., valued at £511,566 in 1913. Though these figures show an increase of 60 per cent. in 1914, it should be remembered that owing to labour troubles at the Port of Dublin during the latter half of 1913 shipments of goods from that Port were greatly curtailed, and quantities of wool held over during this period were shipped during the early months of 1914. While exporting this large quantity of raw material, Ireland is importing large quantities of the finished woollen goods, and it is not simply in one branch, but in several—in wood, hides and skins, wool, as well as in various minor exports, such as feathers, kelp, and most of all in her store cattle—that Ireland is exporting the raw materials of industry.

III. MANUFACTURED ARTICLES.

The third division of Irish imports and exports is that of manufactured goods. The value of the imports in 1914 was estimated at £36,000,000, or close on 50 per cent. of the total value of imports. The export of manufactured goods was estimated at £31,000,000, or about 40 per cent. of the value of the total export. In imports there was a decrease of £460,000, and in exports an increase of £3,000,000 as compared with 1913. As stated above, the increase in exports was due to increased output of shipping tonnage.

The values given in these Reports are estimates based on the actual quantities imported or exported, and accordingly the values of goods such as agricultural products and raw materials, which are usually sold by weight, are bulky and are easily defined, will be found to be fairly accurate; the less bulky and more extensive class of manufactured goods are naturally more vaguely described on the manifests, and accordingly their estimated values are less reliable than the values of agricultural products and raw materials. As pointed out in previous Reports, the values of manufactured goods cannot be satisfactorily determined from the information given in the present system of Returns.

The first and largest group of manufactured goods is that of the textiles. The combined value of imports and exports in 1914 of manufactured textile goods

Textiles.

amounted to £38,828,491 as compared with £40,426,315 in 1913, a sum almost one-half of the total value of all manufactured goods imported and exported. Distinguishing yarns, thread, rope, cordage, &c., from piece goods and made-up goods, the value of the imports of the former was in 1914 estimated at £2,067,098 as compared with £2,090,911 in 1913. The imports of piece goods, ready-made goods, drapery, and apparel in 1914 amounted to £15,141,422 as compared with £16,270,927 in 1913; the exports to £18,884,034 as compared with £19,041,384 in 1913. A considerable quantity of cotton goods is imported for purposes of further manufacture, and is afterwards re-exported. The outstanding feature in the case of exports, is the fact that three-fourths of the textile piece goods exported are returned as "linens," but this term in the returns of the portal authorities has a wide significance, and probably includes cotton, union, and other textile goods which are consigned as "linens." The estimated value of exports of "linen" goods amounted to £14,353,032 as compared with £14,112,918 in 1913. The returns show an increase in the value of the exports of woollen goods from £629,344 in 1913 to £678,440 in 1914, but the exports are still considerably less than the imports.

The group of metals and metal articles, machinery, ships, &c., is a very wide class, and in gross annual value

Metal and Metal Manufactures. is next in importance to the textiles. It is estimated that in 1914 the total value of the imports of metals and metal manufactures

reached almost £8,500,000, while the exports, which include the

export of steam vessels, were estimated at £7,900,000. Among the imports, £2,068,000 represented steel, bar and wrought iron, and plates and sheets, imported chiefly into Belfast; £1,810,704 represented machinery (chiefly agricultural and textile) and railway engines; and £937,000 represented imports of cycles and motor cars. As regards exports, considerable quantities of machinery are shipped from Belfast, while the export of steam vessels is of a very large annual value, estimated in 1914 at, approximately, £6,703,000, an increase of over £3,500,000 compared with the previous year. Thus there are large individual exports in this class, but as a whole the trade in hardware and metal goods and manufactures stands in contrast to the textile trade. For whereas the value of the textile exports appears even greater than that of the imports there is a very large surplus of metals and metal manufactures imported over what is exported.

Leather and Leather Goods.—The imports of this group amounted to £3,018,419; the exports to £341,922. Included in the imports were leather valued at £561,299, and boots and shoes valued at £1,806,021.

Wooden Manufactures.—The imports were valued at £1,300,439 and the exports at £420,083. The imports included furniture valued at £587,232. It is difficult to say how much of this was a genuine import, as it is known that considerable quantities of private furniture (removals) are included in this figure.

Paper, Stationery, etc.—The imports of this group amounted to £1,142,422 and the exports to £318,411. The value of paper imported amounted to £527,471.

Earthenware, China, Glass, etc.—The total value of these imports amounted to £1,078,774. The exports were small, valued at £26,493. Glass, glassware, and bottles imported amounted to £475,992.

Chandlery.—The value of the imports of chandlery, including many classes of goods, such as oils, paints, soap, candles, etc., amounted to £2,382,324; the exports to £146,078.

Chemicals and Fertilisers.—The total value of the imports of chemicals, fertilisers, and dyestuffs amounted to £1,329,213; the exports to £226,554. The value of fertilisers imported was £753,129; the exports amounted to £180,383.

The above analysis indicates briefly the extent and character of

Source and Destination of Imports and Exports	Irish trade. With regard to the question of the source or "country of origin" of the imports and the final destination of the exports, as stated in previous Reports, the existing returns furnish little information. The trade which passes directly between Ireland and colonial and foreign
--	---

countries is known, and the more important details as regards this trade at the chief ports in Ireland are presented annually by the

Customs and Excise Department in their Statement of the Trade of the United Kingdom. The direct imports of foreign and colonial goods into Ireland during 1914 amounted to a value of £14,562,992, whereas the direct exports amounted to £1,219,812, of which £725,840 consisted of re-exports of foreign and colonial goods. But as regards the indirect colonial and foreign trade of Ireland which passes to and from the Irish ports *via* those of Great Britain, especially Liverpool and London, there are at present no means of distinguishing this from the colonial and foreign trade of Great Britain. Consequently the total trade of Ireland with countries outside of Great Britain cannot at present be ascertained.

With regard to the total extent of the Irish import and export trade, the imports per head of population, according to the present returns, amount to £16 16s. 3d., and the exports per head to £17 12s. 11d.; or if the estimated value of re-exports is excluded, the imports amount to a value of £16 4s. 11d. per head of population, and the exports to £17 1s. 6d. per head. It is of interest to compare these amounts with the corresponding figures for other countries which are shown in the following table:—

COUNTRY	Estimated Population.	Thousand £'s (000's omitted.)		Imports per head of Population.	Exports per head of Population.
		Total Imports for Home Consumption.	Total Exports of Domestic Produce.		
	No.	£	£	£ s. d.	£ s. d.

* Excluding re-exports estimated at £2,500,000.

As has been pointed out in preceding reports these figures indicate the wide difference which there is in the extent of foreign trade of different countries as measured per head of population. In some States, especially those of wide area and varied climatic conditions, the extent of foreign trade in proportion to the total production of the country is small. In all such cases increase or decrease in imports or exports is a very subordinate factor in the industrial progress of the country, and the growth of wealth depends chiefly on internal development and internal trade, and not on the exchange of commodities with other nations. On the other hand, countries which are small in size and with good maritime communication have in general a large foreign trade. Thus it is with Denmark, Belgium, and Holland ; thus also with Ireland.

This consideration has a very direct bearing on the question of the present returns. For the larger the foreign or external trade is in proportion to the internal trade, the greater to such a country is the importance of having as full and accurate as possible a record of this external or foreign trade. It is accordingly of the greatest importance to have as full and reliable a record as possible of the external trade of Ireland. Such a record is of great industrial and commercial value, and this commercial purpose is the main value of trade statistics such as are submitted in the present Report. As regards the wider inferences of national gain or loss, these require the evidence of very much fuller data.

The references in the Consular Reports to Irish trade in 1914 have been brought together as in the Reports for previous years and are reprinted in the first Appendix. They represent the references to be found in the Consular Reports published since the last issue of this Report. In the second Appendix a table is presented showing the quantities and values of imports of the chief articles of agricultural produce into the United Kingdom from British possessions and from foreign countries, during the year 1914, and the corresponding exports from Ireland to Great Britain.

Two interesting diagrams are attached to this Report showing (I.) the monthly export of eggs from Ireland, and the monthly import of eggs from foreign and colonial countries into the United Kingdom ; and (II.) the monthly export of butter from Ireland and the monthly import of butter from foreign and colonial countries into the United Kingdom. A remarkable similarity exists in the curves representing the monthly exports of butter and eggs from year to year, and unfortunately in each case the months of largest Irish shipments are the months when prices are low, and the months of lowest Irish shipments are the months of highest prices. The curves representing the exports from Denmark do not show such wide variations from month to month.

In conclusion, I desire to acknowledge the assistance given by the port and harbour authorities of Ireland, the railway and shipping companies, and by many individual importers and exporters. I am also specially indebted to the Principal of the Statistical Office of

the Customs and Excise Department, and to the Comptroller-General of the Commercial, Labour, and Statistical Department of the Board of Trade, for the information which they have kindly afforded.

I am, Sir,

Your obedient Servant,

THOMAS BUTLER,
*Superintendent of Statistics and
Intelligence Branch.*

APPENDIX I.

Extracts relating to Irish Trade with Foreign Countries, taken from the Consular Reports of the undermentioned Countries :—

A.—FOR THE YEAR 1913 (*continued from previous Report*).

EUROPE.

GERMANY.

Hamburg.—It is, as stated in previous years, not possible to furnish statistics of the trade between Hamburg and Ireland as no special returns thereof are kept at this port.

Stettin.—The import of Irish herrings was again fairly large, but sales were not readily effected, as these brands are not so well known as the Scotch and English, and therefore fetched 1s. 6d. to 2s. less per barrel.

GREECE.

Thessaly.—Goods emanating from Ireland are included in those coming from the United Kingdom, it being impossible to obtain separate information on the subject.

PORTUGAL.

Lourenco Marques.—I have been unable to identify any of the articles included in the list of imports as being of Irish origin.

RUSSIA.

Libau.—The only shipments made to Ireland during the year 1913 were of 25 tons of veneer (three-ply) to Belfast, and of 28,248 cubic feet of deals and boards to Dublin. The shipments of grain, flax, hemp, oil cake, &c., have entirely ceased.

Odessa.—There is no trade between Odessa and Ireland, except in fine handkerchiefs.

Nicolaieff.—There were no imports from Ireland.

Riga.—I am unable to furnish separate particulars with reference to trade with Ireland in 1913.

In January a large business was done to Scotland and Ireland in water retted descriptions of flaxes.

SPAIN.

Denia.—Orders for raisins from Ireland amounted to about 550 tons, which quantity may be stated as the only trade carried on with that island.

AMERICA.

CHILE.

Caleta Buena.—No direct trade exists between this port and Ireland.

UNITED STATES.

Galveston.—Imports from Ireland during the years 1911-13 were as follows :—

Articles.	1911	1912	1913
Ale and stout	£ 3,383	£ 1,585	£ 795
Cotton, manufactures of	—	295	—
Felt	214	—	47

Staves	—	—	—	10,620	11,793	5,363
Wheat ... Bushels	—	—	24,000	—	—	4,850
Other articles	—	—	—	—	43	—
Total	—	—	—	12,695	34,982	38,465

B.—FOR THE YEAR 1914.

AMERICA.

BRAZIL.

Para.—As in previous years, the principal articles imported from the United Kingdom were coal, rice, salt, soap, hardware, corrugated iron, zinc sheets, tea, whisky, stout and ginger ale (the last from Belfast).

UNITED STATES.

Chicago.—The following was the value of the direct imports into Chicago from Ireland for the past three years :—1912, £148,230 ; 1913, £166,321 ; and 1914, £184,094. Lines to the value of £1,669 were imported into Omaha from Ireland.

Hawaii.—Imports from Ireland amounted to only £305 worth.

St. Louis.—The total value of the Imports from Ireland into this consular district was—Colorado, 251 dollars ; St. Louis, 346,271 dollars ; and Tennessee, 7,443 dollars. 19,335 barrels of flour were sent from St. Louis to Ireland in 1914.

ASIA.

JAPAN.

Figures for Ireland are not given separately.

The following tables (pp. 95-105) extracted from publications issued by the Bureau of Statistics, Washington, show the imports and exports into and from Ireland from and into the United States during the twelve months ended 30th June, 1914. The tables, however, do not cover the whole trade between Ireland and the United States. Goods manufactured or produced in Ireland, sold to firms in England, and by them exported to the United States, are, as a rule at least, accredited in the reports of the Bureau to England and not to Ireland.

TOTAL VALUE OF TRADE BETWEEN IRELAND AND THE UNITED STATES DURING TWELVE MONTHS ENDED 30TH JUNE, 1913 AND 1914.

	1913. Dollars.	1914. Dollars.
Total Imports into Ireland from the United States ...	13,750,656	11,679,517
Total Exports from Ireland to the United States free of duty ...	375,909	1,399,800
Total Exports from Ireland to the United States subject to duty	18,249,675	16,413,173
Total Imports and Exports ...	32,376,240	29,492,550
